

Rulif Fadria Nirwansyah

Bandung Barat, West Java, Indonesia | +6281382916024 | ruliffax@gmail.com | [linkedin.com/in/ruliffadrian](https://www.linkedin.com/in/ruliffadrian) | github.com/rulifcode | <https://webrulif.vercel.app>

Objective

Junior Developer with proven experience developing responsive, interactive, and high-performance web application interfaces using HTML5, CSS3, JavaScript (ES6+), React.js, and Tailwind CSS. Skilled in translating Figma/UI designs into clean, maintainable code and integrating RESTful APIs for seamless frontend-backend collaboration. Experienced in cross-browser compatibility, performance optimization, debugging, and Agile/Scrum workflows.

Education

SMKN 1 Cisarua

2020 – 2023

Software Engineering

- Mastered core web technologies: HTML, CSS, JavaScript, PHP, and Java
- Implemented OOP principles and CRUD-based web application development
- Developed understanding of web architecture and object-oriented programming concepts
- Learned CodeIgniter & Laravel frameworks for backend web development

Experience

Praktek Lapangan Kerja – PT. Cakrawala Global Yaksa

01 Jul, 2022 – 31 Dec, 2022

Web-Based Payroll (Penggajian Karyawan) Application

- Built a web-based payroll application using CodeIgniter and Laravel with MySQL, covering full UI development and backend integration.
- Applied OOP concepts and designed relational database structures to meet payroll system requirements.
- Deployed the application to a live server via cPanel, managing domain configuration, file structure, and hosting setup.
- Conducted testing and debugging throughout the development lifecycle to ensure system stability.
- Prepared technical documentation for end-users and system administrators.

Gaotek Inc – Web WordPress Developer

Oct 2025 – Dec 2025

Internship – Remote (Canada/USA)

- Developed and maintained responsive website interfaces and online stores using WordPress and WooCommerce, including custom theme development and plugin configuration.
- Sliced and implemented Figma UI designs into pixel-perfect, responsive WordPress themes ensuring cross-browser and cross-device compatibility.
- Implemented on-page SEO best practices — metadata optimization, content structuring, and keyword targeting — to improve search engine visibility.
- Managed local development using XAMPP and handled live deployment and hosting configurations.

Vodjo – Software Quality Assurance

Sep 2025 – Present

Internship – Hybrid

- Conducted functional and API testing using Postman across 6 projects including mobile apps (iOS & Android), CMS platforms, e-commerce, and corporate websites.

- Performed automation testing using Cypress and Playwright for end-to-end (E2E) test coverage across web applications.
- Developed and maintained automated test scripts to validate critical user flows, UI interactions, and API responses.
- Collaborated with frontend and backend developers to identify, reproduce, and resolve UI/UX bugs and functional issues.
- Documented and tracked test results, bug reports, and client feedback to support continuous product improvement.
- Maintained clear communication with stakeholders on project updates, test outcomes, and issue resolution.

Lumoshive Academy – Frontend Developer Trainee

01 Dec, 2025 – 18 Mar, 2026

Bootcamp Batch 3

- Developed responsive and interactive web application interfaces using React.js with component-based architecture.
- Translated Figma UI/UX designs into pixel-perfect, responsive, and cross-browser-compatible web interfaces.
- Built reusable and modular UI components following clean code principles and DRY methodology.
- Managed application state using React Hooks (useState, useEffect, useContext) and Redux Toolkit.
- Integrated RESTful APIs using Fetch API and Axios for dynamic, real-time data handling.
- Implemented client-side routing with React Router and optimized frontend rendering performance.
- Utilized Tailwind CSS to build modern, responsive, and accessible user interfaces.
- Applied TypeScript to enforce type safety, improve scalability, and reduce runtime errors.
- Performed comprehensive testing: Unit Testing, Integration Testing, and End-to-End (E2E) Testing.
- Implemented CI/CD pipelines to streamline code integration, testing, and deployment workflows.
- Collaborated with backend (Golang) team to integrate APIs and develop features for a Web App e-commerce project.
- Ensured cross-browser and cross-device compatibility throughout all developed interfaces.
- Conducted debugging, bug fixes, and iterative feature improvements across project sprints.
- Applied Agile/Scrum methodology including sprint planning, daily standups, and retrospectives.
- Participated in peer code reviews and live coding sessions to strengthen problem-solving skills.

Projects

Ubuntu E-Commerce Platform & Admin Dashboard

Jan – Mar 2026

React.js, TypeScript, Redux Toolkit, Axios, Tailwind CSS, React Router, React Hook Form, Yup, JWT | Team Lead & Frontend Integrator

- Led frontend development as Team Lead and main integrator for a full-featured e-commerce platform with separate customer-facing storefront and admin dashboard.
- Architected and implemented the complete authentication flow including Register, Login, Reset Password, JWT token handling via Redis, and role-based protected routes (Admin/Staff).
- Performed technical bug mitigation against backend API issues, ensuring stable end-to-end functionality across all features.
- Implemented key storefront features: product listing with pagination & filter, best-selling products, weekly promotions, wishlist, and shopping cart with real-time quantity updates.
- Built admin dashboard features: daily/monthly sales summary, revenue analytics, top-selling products, and exportable reports.
- Conducted final refactoring and debugging to ensure production-ready code quality and deployment stability.
- Applied performance optimizations: code splitting, lazy loading, skeleton loading, SWR data fetching, and dark mode support.
- Achieved perfect score (100/100) — recognized by tutor as demonstrating near-industry-level standards.

Rulif Taskify – Movie Discovery App

2025 – Present

Next.js, Tailwind CSS, Axios, TMDB API, VidSrc API, Framer Motion, Firebase, Node.js | Personal Project

- Built a full-featured movie discovery and streaming web application using Next.js with server-side rendering for optimal SEO and performance.
- Integrated TMDB API for real-time movie data including search, genres, trending, and detailed movie information.
- Integrated VidSrc live server API to enable in-app movie streaming with dynamic video player.
- Implemented smooth UI transitions and micro-interactions using Framer Motion for an engaging user experience.
- Utilized Firebase for user authentication and data persistence, and Tailwind CSS for fully responsive design.

Corporate Website – Gaotek Inc (WordPress)

Oct – Dec 2025

WordPress, WooCommerce, Figma, CSS, XAMPP, cPanel | Internship Project

- Developed and maintained a responsive corporate website and online store for an international client (Canada/USA) using WordPress and WooCommerce.
- Sliced Figma UI designs into custom WordPress themes with precise implementation of layout, typography, and visual components.
- Configured plugins, managed product catalog, payment integration, and applied on-page SEO practices to improve search visibility.
- Ensured cross-browser and cross-device compatibility for a consistent user experience across all platforms.

Perpustakaan Online – Library Management System

2025

PHP Native, MySQLi, HTML5, CSS3, JavaScript, XAMPP | Personal Project

- Built a full-stack web-based library management system using pure PHP and MySQLi 2014 no framework dependency 2014 demonstrating strong command of web fundamentals.
- Implemented multi-level authentication with role-based access control (Admin 0026 User) and secure session management.
- Developed comprehensive book management: CRUD operations, image upload, advanced search 0026 filter, and category management.
- Built a complete transaction system covering book borrowing, return management, due date tracking, and automatic fine calculation.
- Created reports 2025 analytics module with borrowing statistics, monthly/yearly reports, user activity tracking, and inventory reports.
- Designed responsive and clean UI/UX ensuring cross-device compatibility without relying on external CSS frameworks.
- Structured codebase in modular architecture (auth, books, users, transactions, reports) for maintainability and scalability.

Certifications

Frontend Web Development with React Batch 3 – Lumoshive Academy

31 Mar, 2026

- Successfully completed Frontend Web Development with React Batch 3 (Dec 2025 – Mar 2026). Final project score: 100/100. Transcript score: 95.9.

React Advanced – Lumoshive Academy

18 Mar, 2026

- Covered advanced React concepts including Redux Toolkit, React Hooks, TypeScript, PWA, Unit/Integration/E2E Testing, CI/CD, and Agile/Scrum methodologies.

React – HackerRank

17 Sep, 2025

- Certified in Basic Routing, Rendering Elements, State Management, Handling Events, ES6, and Form Validation.

JavaScript Basic – HackerRank

15 Sep, 2025

- Certified in core JavaScript concepts including data structures, functions, and algorithmic problem solving.

Code Generation and Optimization Using IBM Granite

24 July, 2025

Learned AI prompting, code optimization, and AI integration in software development workflows. Capstone: E-Commerce Web App (React.js, Node.js, Firebase & Git) deployed on Netlify.

Hard Skills

- Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript | React.js, Next.js, Redux Toolkit
- UI/Styling: Tailwind CSS, Responsive Design, Cross-Browser Compatibility, Figma-to-Code, Accessibility, Framer Motion
- State & API: React Hooks, REST APIs, Fetch API, Axios, Mock APIs, Firebase
- Testing & DevOps: Unit Testing, Integration Testing, End-to-End (E2E) Testing, Git, GitHub, CI/CD
- Tools: VS Code, Postman
- Backend & Database: PHP, Laravel, CodeIgniter, Golang, Node.js, MySQL, PostgreSQL, Firebase Firestore
- Cloud: Firebase Authentication, Netlify, Vercel, cPanel
- CMS & Methodologies: WordPress, WooCommerce, On-Page SEO, Agile/Scrum, PWA, DRY Principles

Soft Skills

- Strong leadership and team coordination — proven as Team Lead in bootcamp final project
- Strong problem-solving and analytical thinking
- Effective communication and cross-functional team collaboration
- Time management and ability to meet project deadlines
- Fast learner and highly adaptable to new technologies and workflows
- Detail-oriented with focus on clean, maintainable, and scalable code
- Responsible, disciplined, and consistent in project execution
- Able to work under pressure and efficiently handle debugging and troubleshooting
